

## FAQs about Cash

Cash in your wallet: Which bill do you think gets worn out the quickest?

You might guess the dollar bill, but both the \$5 and \$10 bills have shorter life spans. The \$5 bill is in circulation about 4.7 years and the \$10 bill lasts about 5.3 years... and the \$1 bill lasts 6.6 years. Now the \$100 bill must not change hands too frequently because those last about 22.9 years!

If you have other questions about currency and coins, head over to the Federal Reserve website and check out their FAQs at <https://www.federalreserve.gov/faqs/currency-coin.htm>
